AST Releases New OEM Pressure Sensor Products Catalog

Mt. Olive, NJ - May 18, 2009. American Sensor Technologies, Inc. (AST) has released a new OEM Pressure Sensor Products Catalog. Due to an expanding product line and added capabilities, their OEM market focused products are segmented into a 53 page booklet.

The catalog features twenty pressure sensors for gauge, absolute and differential pressure measurement in pressure ranges from as low as 2.5 PSI and up to 60,000 PSI. Both analog and digitally compensated pressure sensors are offered with and without digital displays. Accessories such as connectors and cooling adaptors; and options such as flush diaphragms and O2 Cleaning are also highlighted as new accommodations for AST's growing customer base.

The OEM Pressure Sensor Product Catalog includes application notes featuring typical installations for each product. Using images from leading industries, the catalog describes how pressure sensors and transmitters are put to use in each application. Also presented are the benefits of AST sensors and the proprietary [Krystal Bond™ Technology](#). Applications covered include HVAC equipment, hydrogen pressure measurement, hydraulic pressure, water pump pressure, level measurement and more.

Request your copy of the AST OEM Pressure Sensor Products Catalog, by emailing: sales@astsensors.com

About AST

AST manufactures state-of-the-art, MEMS-based pressure sensors, transducers and transmitters that offer the best price-performance ratio in the industry. Through the acquisition of noted LVDT manufacturer Macro Sensors (www.macrosensors.com), AST also offers a full line of linear/rotary position sensors, as well as related instrumentation. Common applications of AST sensor products are in industrial OEM, hydraulic systems, fuel cells, medical gases, HVAC/R, refrigeration (ammonia, Freon, CO2), oil & gas exploration and production, and off-road vehicles. By combining exotic metals and AST's exclusive, proprietary [Krystal Bond™ Technology](#), (an advanced process in which inorganic materials are molecularly diffused onto a metallic surface in the presence of certain gases) in the manufacturing of its pressure sensors, AST can produce high-performance pressure units that support the specialized needs of key niche markets. Many AST products are UL listed as intrinsically safe and certified for explosion-proof required environments. For more information on AST products and technology, please visit www.astsensors.com.
